

Facilitation is a skill, and every facilitator has had to up their game over the last year in a world gone so virtual

The challenge

- 1/ How do you keep large numbers of people engaged?
- 2/ How do you track how people are REALLY doing?
- 3/ How do you provide them with the coaching support when they need it?

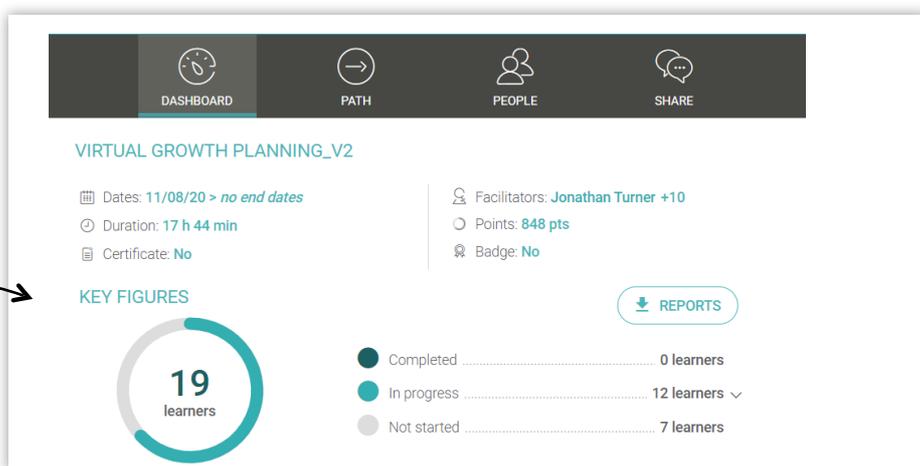

OxfordLIVE is designed to help

OxfordLIVE is a flexible platform for collaboration and learning powered by our partners CrossKnowledge, winners of 18 gold awards at the 2020 Brandon Hall awards

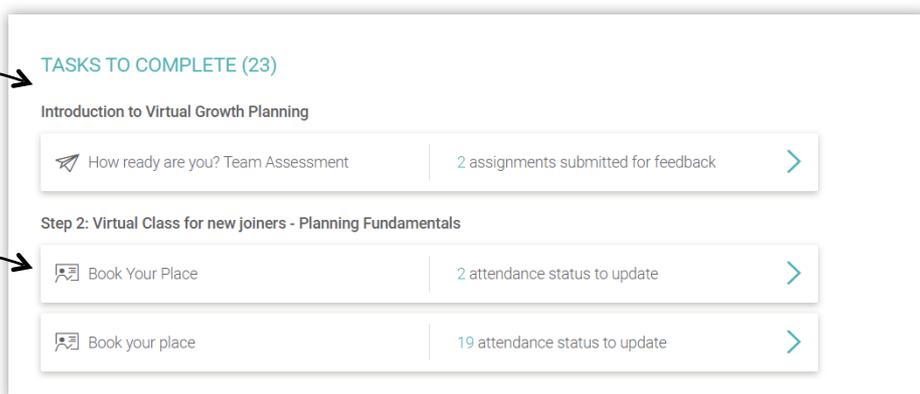

Learning is structured in pathways with clear flexible steps, so each activity is self-contained, and participants can dip in and out of the system, knowing that they can always step back in and pick up where they left off

The platform gives you your own dedicated dashboard to track participation

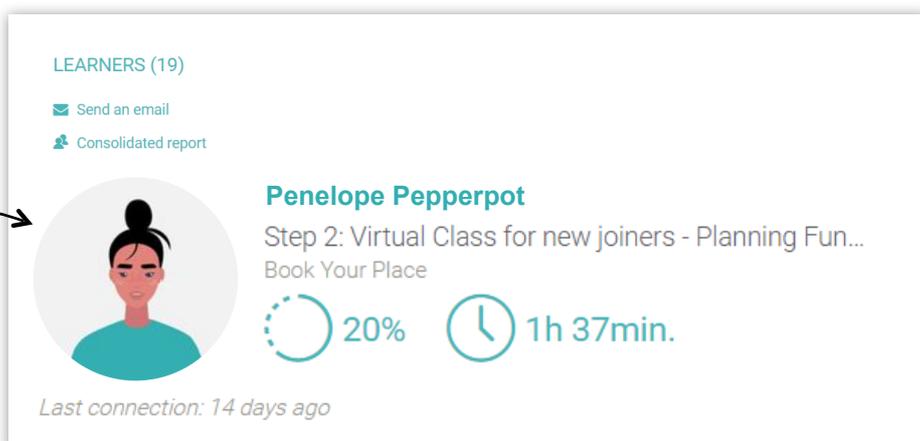

It shows you the big picture where people have got to, with the option to download detailed reports

Highlights tasks people need to do

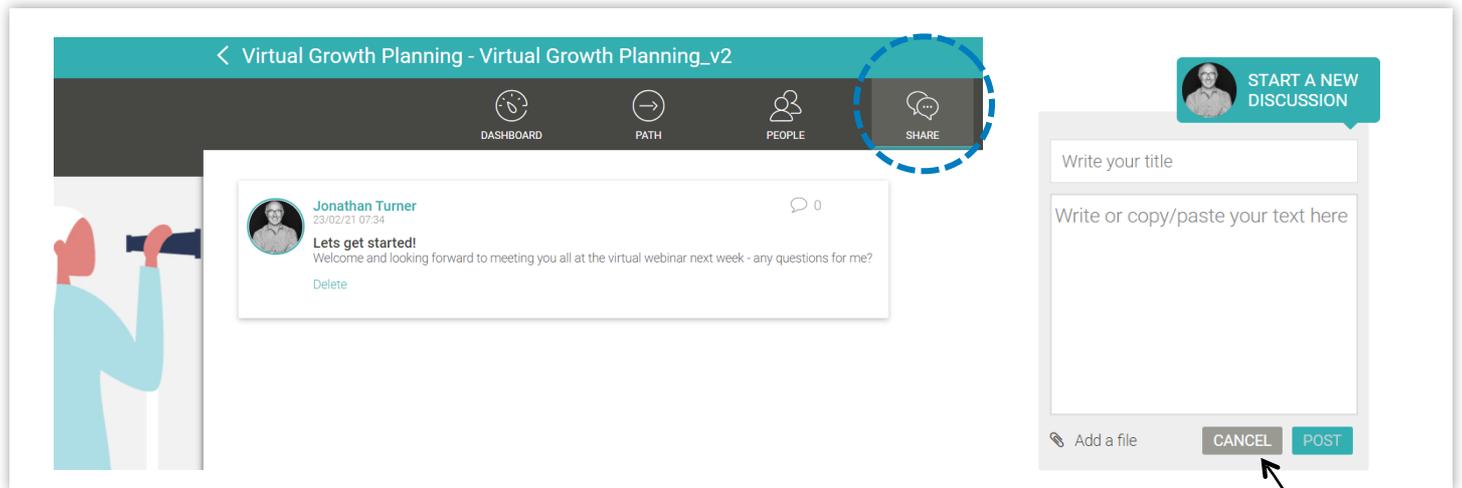

Shows progress on critical steps

And enables you to quickly connect with people

You can create flexible, coachable groups

The system allows you to create smart groups of bespoke or natural working teams, to follow a pathway or receive specific types of learning

Each smart group can have a facilitator attached to support them along the pathway

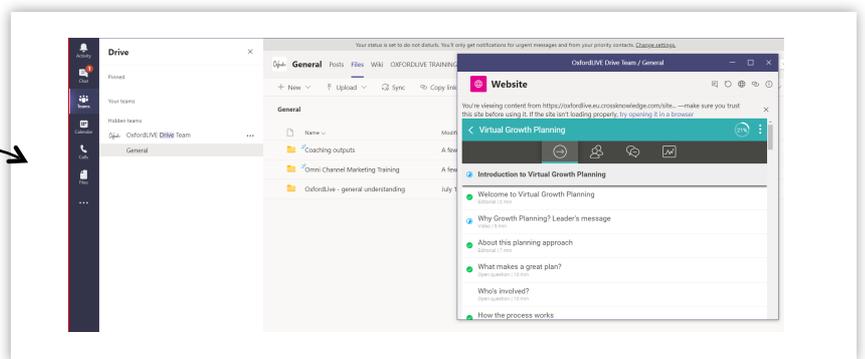

Facilitation and coaching functions are easy to use, so you can give the right advice when people need it. You can see where each person has reached and decide when to help

Event management is simple

Face-to-face or virtual events or classes can be designed into pathways and it's easy for people to register for these and add them to their calendars, with links to MS Teams or zoom. Email management for these sessions can be automated saving you hours of less productive work, and open rates can be tracked

MS Teams is embedded to enable fully blended working

OxfordLIVE content and pathways can be integrated into folders to ensure that work is done in people's normal work flow, and you can access outputs for review and discussion

Data analysis is easy to access

This automated, and all in one screen, with dashboards for smart groups, courses or individuals. You can also download group reports to see more detail, all in one place

Learner's full name	Progress	Total time spent	No. of points	Last step accessed	Last connection	Progress on step 1: Introduction to Virtual Growth Planning
Isabel Aherne	0%	0 min	0	-	24/09/20	0%
Gina Banns	20%	1h 37 min	178	Step 2: Virtual Class for new joiners – Planning Fundamentals	09/02/21	14%
Daniela Baxter	8%	1h 15 min	76	Step 5: Welcome to Planning Week!	07/08/20	3%

Annabel Cameron	1%	11 min	11	Introduction to Virtual Growth Planning	23/09/20	14%

OxfordLIVE - Designed to help facilitators do what they do best virtually
It's more than blended learning, it's what we call blended working
